**Subject:** Hunter Title V permit

Hi Mike,

Utah DAQ issued a major modification of Title V permit for PacifiCorp Hunter plant on April 6, 2015. I feel we have addressed all the comments in your letter dated August 31, 2005. All the exemptions from emission limits during periods of startup, shutdown, malfunction (SSM), and maintenance/planned outage have been removed from the permit.

Would you please take another look on this modification and let me know if you have any concerns and questions on this permit. Thanks!
